Harold J. Bruyere Jr. PhD : 100 Case Studies in Pathophysiology before purchasing it in order to gauge whether or not it would be worth my time, and all praised 100 Case Studies in Pathophysiology:

No Answers Provided to Case Studies By NN The cases are helpful; however, realize that there are NO answers whatsoever to the questions presented in the cases--not a huge problem I suppose, b/c you can google everything, but certainly an annoyance. (esp. when there are multiple possible answers. The author states in the foreword that some of the cases are real; in which case, why not provide the justification presented in the patient's chart as to why that patient takes a particular drug, esp. considering that you may take a drug for its side effects rather than its therapeutic effect. . .anyhow. . .) There should be an option to obtain the answer key after completing a class.
