**CMA -A RMA CPA Alice Covell : 1998 Coding Workbook For The Physician's Office (Medical Assisting Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised 1998 Coding Workbook For The Physician's Office (Medical Assisting Series):

This essential workbook contains coding exercises from each section of the CPT and ICD-9-CM code books. Using the same terms as physicians use when describing services, students will expand their medical vocabulary as they increase their skills in coding for the physician's office. Many of the coding rules from CPT and HCFA (Health Care Financing Administration) are included. Students need current CPT and ICD-9-CM code book references to complete the worksheets in this workbook.
