A Terrible ReproductionBy Beans NevadaThis copy of the 1806 English translation of the first edition of Pinel's Treatise on Insanity was produced by a "robot which automatically flipped and photographed each page" and Optical Character Recognition software. As you might expect it is a terrible reproduction. It has many errors and is hard to read. Since the 1806 translation is a disaster in itself, this reproduction is a double disaster. The 1962 Hafner reprint is much easier to read.

Facsimile of the London 1806 edition. Translated by D. D. Davis, M. D. Bound in the publisher's original red composition leather with the title stamped in gilt on the spine. Decorations stamped in gilt on the covers and spine. Three raised bands on spine. All edges gilt. Marbled end papers. Previous owner's bookplate on front paste down end paper.
