From MedBooks, Inc. : AccuPCS Level II National Supply Code Book 2012 before purchasing it in order to gage whether or not it would be worth my time, and all praised AccuPCS Level II National Supply Code Book 2012:

The first book of its kind in the industry. When time is money, accuPCS provides all of the codes from CMS in a format and style that is new to HCPCS books. By alphabetically listing the codes, anyone can accurately and quickly look up the right code. Codes are listed alphabetically both as CMS has defined them and utilizing "key words." For instance, one would not know that A4550 is the code for a Surgical Tray, however, with accuPCS, it is listed both as Surgical Tray and as Tray, Surgical. Also included are alphanumeric codes with a short description as all current HCPCS books. AccuPCS provides long descriptions for all codes, Addendum's AA, BB, DD1, DD2, definitions of

HCPCS fields, and global follow up days for HCPCS codes.
