From Brand: Artech House : Advanced Materials and Techniques for Radiation Dosimetry before purchasing it in order to gauge whether or not it would be worth my time, and all praised Advanced Materials and Techniques for Radiation Dosimetry:

The purpose of this book is to draw attention to the modern body of knowledge of radiation sensors with a focus on the wide range of gamma radiation dosimeters, both commercially available and under development. It provides

knowledge of the most common and emerging dosimetry methods and materials used for radiation measurement.
