From Academic Press : Aggression, Volume 75 (Advances in Genetics) before purchasing it in order to gage whether or not it would be worth my time, and all praised Aggression, Volume 75 (Advances in Genetics):

Genes interact with the environment, experience, and biology of the brain to shape an animals behavior. This latest volume in Advances in Genetics, organized according to the most widely used model organisms, describes the latest

genetic discoveries in relation to neural circuit development and activity. Explores the latest topics in neural circuits and behavior research in zebrafish, drosophila, C.elegans, and mouse models. Includes methods for testing with ethical, legal, and social implications. Critically analyzes future prospects.
