**M.D. Christopher M. Lowther : An Atlas of Histology of Basal Cell Carcinoma (For Physicians Learning Mohs Surgery)** before purchasing it in order to gage whether or not it would be worth my time, and all praised An Atlas of Histology of Basal Cell Carcinoma (For Physicians Learning Mohs Surgery):

0 of 0 people found the following review helpful. helpful.By Griffitmy parents need it, very fast, receive it next day. good . Sturdy, well balanced, great value low price.

This atlas helps the physician interested in Mohs surgery to differentiate the various types of basal cell cancer with Mohs sections. Included in this edition: digitally captured histology slides depicting examples of basal cell cancer, nodular, superficial, morpheaform, infiltrative and micronodular. Each case includes a new patient with vivid color images describing key features and the diagnosis. Magnification ranging from 12.5X to 400X. Also featured are quizzes where the reader can describe the features and diagnosis. Answers to these quizzes are in the back of the book.
