We have used dry erase markers on the chart occasionally to circle or highlight specific areas that we are studying. The chart always wipes clean. 2 of 2 people found the following review helpful. Love this, very useful for our family! By Spkssftly Great reference to have available for anyone looking to retain what they've learned from AP classes. Lots of labelling for many systems. Also

very handy to have on hand when kids have questions about the human body, and is laminated to protect against kids tracing fingers over bones, nervous systems and circulatory systems, etc. 0 of 0 people found the following review helpful. great reference item for classroom wall By John C. great reference item for classroom wall, the text is too small for reading from more than a few feet away so don't expect many people to be able to use it at the same time but that is just the cost of having that much information on one poster.

Over 900 anatomical identifications Covers all major systems Attractive design Measures 24" x 36"
