A.A. Afifi : Biostatistics: An Electronic Companion before purchasing it in order to gauge whether or not it would be worth my time, and all praised Biostatistics: An Electronic Companion:

4 of 5 people found the following review helpful. Good stuff! By A Customer Wow! Who knew Biostatistics could actually be fun? It had been a several years since I'd had any courses in this subject and my memory of it was that it was difficult and rather dry. But as soon as I popped in this CD, it was like learning it all over again. And this time it was a lot of fun! To have the material presented the way it is in this software (ie-using really cool multimedia), makes it not only very understandable, but very interesting as well. I'd certainly say this is a must for a student or anyone else interested in Biostatistics.

This is a multimedia study guide that will help you achieve better grades. Developed by prominent educators and researchers, this guide will complement any Biostatistics text.

About the Author Abdelmonem A. Afifi, the lead author, is Dean of the UCLA School of Public Health. His research centers around multivariate statistical data analysis, most recently meta-analysis, as well as broader issues of public health education. His co-author Martin Lee, also of UCLA, focuses on clinical trials and clinical trial design. He is also co-author of a recent applied immunology textbook. Co-author George W. Cobb is on the faculty at Mt. Holyoke College in Massachusetts, and is the author of *Teaching Statistics*, published by the Mathematical Association of America.
