Francesco Sardanelli, Giovanni Di Leo : Biostatistics for Radiologists: Planning, Performing, and Writing a Radiologic Study before purchasing it in order to gauge whether or not it would be worth my time, and all praised Biostatistics for Radiologists: Planning, Performing, and Writing a Radiologic Study:

The aim of this book is to present statistical problems and methods in a friendly way to radiologists, emphasizing statistical issues and methods most frequently used in radiological studies (e.g., nonparametric tests, analysis of intra-

and interobserver reproducibility, comparison of sensitivity and specificity among different imaging modality, difference between clinical and screening application of diagnostic tests, ect.). The tests will be presented starting from a radiological "problem" and all examples of statistical methods applications will be "radiological".
