**Teresa Thiel, Shirley T. Bissen, Eilene M. Lyons : Biotechnology: DNA to Protein -- A Laboratory Project in Molecular Biology** before purchasing it in order to gage whether or not it would be worth my time, and all praised Biotechnology: DNA to Protein -- A Laboratory Project in Molecular Biology:

This one-semester, project-based laboratory manual gives junior/senior level students the opportunity to characterize the enzyme alpha-amylase. As students proceed through the sequenced experiments, they will learn the principles of DNA, RNA, and protein structure by using modern-day laboratory techniques. Genetics, cell biology, and organic

chemistry are prerequisites.
