Leslie P. Gartner, Judy M. Strum, James L. Hiatt : Board Review Series Cell Biology and Histology (Book with CD-ROM) before purchasing it in order to gage whether or not it would be worth my time, and all praised Board Review Series Cell Biology and Histology (Book with CD-ROM):

1 of 1 people found the following review helpful. Good bookBy Book LoverThis is a good book to use right before your exam. I use this for my medical histology and cell biology course.0 of 0 people found the following review helpful. Five StarsBy Carlos MMust have!4 of 13 people found the following review helpful. Super for the boardsBy

A CustomerI found this book to be really helpful. I know people who used some other books to prepare for histology and regretted it. The book is laid out in outline manner which makes finding information easy. The questions were just like the kinds I encountered on my Step I exam. I highly recommend this book.

This Fourth Edition continues the BRS tradition of an outline format with content review followed by USMLE-style questions at the end of each chapter. Each chapter also features a high-yield section on clinical correlations. The book is concise and well illustrated, with line drawings and electron micrographs. A USMLE format comprehensive examination, which contains 500 questions, is at the end of the book. This edition includes a CD-ROM with all of the text questions and an additional 100 colour images to accompany these questions - all in the USMLE style
