Robert E Hawkins : Cellular Therapy of Cancer: Development of Gene Therapy Based Approaches before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cellular Therapy of Cancer: Development of Gene Therapy Based Approaches:

Cancer research has progressed enormously in recent years. This review volume will address recent findings in the

area of T-cell therapy for cancer, including use of tumour infiltrating lymphocytes (TILs) as a therapy for melanoma, choice of target antigens, advances in engineered receptors, methods of gene transfer to T cells, review of cell processing methods and clinical trial design. Written by leading scientists in the field, this up-to-date review on cancer research will be an important reference source to the researchers and healthcare professionals in the field. Readership: Cancer researchers, oncologists and healthcare professionals.
