Sergio Canavero MD, Vincenzo Bonicalzi MD : Central Pain Syndrome: Pathophysiology, Diagnosis and Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Central Pain Syndrome: Pathophysiology, Diagnosis and Management:

Central Pain Syndrome is a neurological condition caused by damage specifically to the central nervous system - brain, brainstem, or spinal cord. This is the only up-to-date book available on the clinical aspects (including diagnosis

and therapy) of CPS management. The authors have developed a very complete reference source on central pain, which includes background material, pathophysiology, and diagnostic and therapeutic information. A medical mystery for 100 years with no effective cure, this book turns the concept of incurability of central pain on its head, providing a rational approach to therapy based on a rational theory.
