From CRC Press : Clinical Head and Neck Anatomy for Surgeons before purchasing it in order to gage whether or not it would be worth my time, and all praised Clinical Head and Neck Anatomy for Surgeons:

0 of 0 people found the following review helpful. Could be better.By Richard Hughes DDSThis book has potential but falls short. It has very limited suitability for oral and maxillofacial surgery, dental implant surgery and dentistry in general.0 of 0 people found the following review helpful. Pictures not clear enoughBy Laura ToddReturned, pictures not clear enough for teaching

Clinical Head and Neck Anatomy for Surgeons provides a refreshing new approach to the surgical anatomy of one of the most complex regions of the human body, the head and neck region. While similar books exist, few are written by surgeons for surgeons, detailing and illustrating the relevant surgical anatomy that needs to be mastered before operating in this fascinating area. The book provides an expert overview of the relevant anatomy encountered during

surgery along with anatomical relationships and valuable tips. Each chapter describes in detail the anatomy of a key area or structure, accompanied by high-quality medical illustrations to aid in understanding. The book also includes text with essential details of both common and rare anatomical variants as well as potential danger areas and pitfalls, thus enabling surgeons to be fully prepared for most eventualities. Thoroughly illustrated with colour clinical photographs taken during surgery, the book displays the essential anatomy as encountered in the operating theatre. Line diagrams have been added where needed or when surgical photographs do not succinctly illustrate the point being made. A few radiological images have also been incorporated to complement the surgical anatomy. This book will provide you with trustworthy guidance to avoid hazards and assist with consistent outcomes for your patients.

About the Author Edited by Peter A. Brennan, MD, FRCS, FRCSI, FDS, consultant maxillofacial surgeon and professor of surgery, Queen Alexandra Hospital, Portsmouth, UK; 2016 president of the British Association of Oral and Maxillofacial Surgeons; and chairman, Intercollegiate Committee for Basic Surgical Examinations (MRCS and DOHNS) for UK and Ireland.
