Highly Commended, Basic and Clinical Sciences, BMA Awards 2007! Concise, current, and richly illustrated, this one-of-a-kind text encompasses cellular and molecular biological concepts as well as classical morphology to present histology from a functional perspective. A wealth of superb illustrations including light and electron micrographs as well as schematic diagrams and three-dimensional drawings make all concepts easy to understand, and clinical correlations underscore the practical relevance of the material. Helpful tables and summary statements summarise vital information at a glance. Thoroughly updated to reflect all of the latest concepts and advances in the field! Features an

abundance of illustrations, including micrographs, diagrams, drawings, and tables that clarify essential information. Provides clinical considerations in each chapter when appropriate. Key terms are bold face and chapter summaries alert students to important content. Provides a comprehensive cross-referenced index for easy location of needed information. Comes with STUDENT CONSULT - enabling you to access the complete contents of the book at www.studentconsult.com, perform sophisticated searches, and take personal notes online enhance your learning by completing 100 USMLE-style review questions and answers follow "Integration Links" to bonus content from other STUDENT CONSULT titles clip and download content to your handheld device and much more. Contains a set of PowerPoint slides on CD-ROM, prepared by the authors, that offers you a convenient way to review the most essential information from the text. Offers more light micrographs and electron micrographs than ever before - with an increased number of labels in each micrograph to completely identify all of the features represented. Provides an increased focus on molecular biology. Delivers more clinical correlations throughout to more thoroughly demonstrate clinical implications.

"This is a clearly written, well-illustrated book that is easy to read and presents its information in a way that engages the reader fully. The photomicrographs, electron micrographs and diagrams are excellent quality and clearly labelled, providing a great visual accompaniment to the text. The authors have also included sections called clinical correlations that put the factual information into the context of a clinical scenario, providing additional useful information for their readers. The presence of a CD-Rom and access to an educational website is also very valuable. It is clear that this book is focused on making the information accessible and interesting to the reader and the authors have clearly succeeded in this aim." BMA Awards 2007

About the Author Leslie P. Gartner, Professor of Anatomy (Ret.), Department of Biomedical Sciences at the Dental School of the University of Maryland has received numerous teaching awards and is the author of "Textbook of Histology, 4th Edition" (2016) which has been translated into six languages. He also wrote "Color Atlas of Histology, 7th Edition" (2016). The atlas, which is used by medical schools all over the world, has been translated into eleven languages. He also coauthored "Cell Biology and Histology, 7th Edition" (2015) with James L. Hiatt which has been translated into six languages. Dr. Gartner was the Histology consultant to "Stedman's Medical Dictionary, 28th Edition" (2006). He also coauthored "Textbook of Neuroanatomy, 2nd ed." (2016) with Maria A. Patestas. Dr. Gartner has written numerous other books for Medical and Dental students including "The Autonomic Nervous System Made Ludicrously Simple", "The Skull: A Text Atlas," "Text Atlas of the Brain Made Ludicrously Simple," "Oral Histology and Embryology, 3rd ed" (2015), and coauthored "Textbook of Head and Neck Anatomy, 4th ed." (2010).
