Medicode : E/M Fast Finder--2004 before purchasing it in order to gage whether or not it would be worth my time, and all praised E/M Fast Finder--2004:

The E/M Fast Finder is a carry-along reference to assist the user in assigning the evaluation and management codes that are part of the 99000 series of the Physicians' Current Procedural Terminology (CPT) codes. The reference tables in the E/M Fast Finder and the book's convenient size make it an ideal coding tool whether the provider is in the comfort of an office--with coding resources at hand, or in a busy emergency department, ICU, or hospital. The E/M Fast Finder can be invaluable in all of these situations.
