The BEST review of Histology!By ApoptosisForget about "USMLE Road Map: Histology", "Rapid Review: Histology and Cell Biology ", "BRS Cell Biology and Histology" and "High-Yield Histopathology" - this book is much better and all you need for the coursework and for the USMLE step 1!Actually, on the boards there are no histology MCQs - still, you need to know histology in order understand pathology (when you are a beginner) and (what's much more important, when you are preparing for the USMLE Step 1) to learn how to "read" microscop slides of pathology - this will be heavily tested on boards.This board-oriented

book serves both these purposes very well - unlike all above mentioned reviews of histology, it's virtually packed with gorgeous and very helpful full color illustrations - relevant explanations are kept as concise and to-the-point, as possible. Also, there is just the right number of integrations with other basic subjects, which, being very relevant, don't distract you from the main subject - unlike that in "High-Yield Histopathology". With this book you'll not only excel on the boards, but master histology and cell biology as well! 0 of 0 people found the following review helpful.
