Its usefulness lies in the way it presents topics; that is, it presents them very succinctly. I wish the same author completed all the sections so there would be more continuity and better flow in the writing. One of my only criticisms is that for some sections, some of the information seems to be more trivial rather than necessary for a core understanding of the subject. Sometimes, this makes the reading seem a little disjointed. I took a couple of courses in epidemiology, and I used this as an adjunct to the verbose textbook. Given the modest price, it is not a bad investment.0 of 0 people found the following review helpful. The Secrets Series is breaking new ground again. A two-color page layout, a portable size, and a list of the Top 100 Secrets in biostatistics and epidemiology help readers to better meet the challenges they face today. And, at no extra charge, purchasers also receive online access to the complete contents of the text via Elsevier's innovative STUDENT CONSULT website. Readers will still find all of the features they rely on the Secret Series for a question-and-answer format, lists, mnemonics, and tables and an informal tone that make reference fast and easy. No matter what questions arise in practice or while preparing for boards, this new volume has the answers in print and online. Helps readers understand the applications of complex statistics to medicine and the analysis of factors determining the frequency and distribution of disease in specific populations. Includes a list of the "Top 100 Secrets" to keep in mind during a rotation or residency. Features a compact trim size (5 1/4" x 8 1/2") for enhanced portability. Makes information easier to find with a two-color page layout and "Key Points" boxes. Identifies useful websites to make it easy to find additional information on a specific topic, and provides live links in the online version. Uses bulleted lists, tables, short answers, and a highly detailed index to expedite reference. Features pearls, tips, memory aids, and "secrets" from the experts.
