J. Anthony Seikel, David G. Drumright : Essentials of Anatomy and Physiology for Communication Disorders
before purchasing it in order to gage whether or not it would be worth my time, and all praised Essentials of Anatomy and Physiology for Communication Disorders:

4 of 5 people found the following review helpful. not bad for anatomy!By SLP- in trainingStudying anatomy and physiology is usually overwhelming. This book breaks it up in a clear and conscise way.

Written as an accessible, easy to use anatomy and physiology book for introductory communication sciences courses and speech-language pathology assistants, this resource is derived from the best selling Anatomy and Physiology for Speech, Language, and Hearing, 2nd Edition. Richly illustrated, this book is accompanied by a CD-ROM that provides users with additional information on the anatomy and physiology of the speech and hearing systems through

interactive self-study, animations, quizzes, and more. A comprehensive glossary provides definitions of key terms and study questions accompany each chapter, allowing users to test their understanding of information. Written in user-friendly language, this must-have book is perfect for anyone who wants to understand the essentials of anatomy and physiology of communication disorders.

About the AuthorJ. Anthony (Tony) Seikel, Ph.D., is professor of communication sciences and disorders at Idaho State University in Pocatello, Idaho. His research interests center on the relationship of pathology to acoustics and perception, as well as improving pedagogy through technology. He has recently been studying the relationship between oromyofunctional disorders and oropharyngeal dysphagia. He earned his B.S. in Speech and Hearing from Phillips University, his M.A. in Speech Pathology from Wichita State University, and a Ph.D. in Speech and Hearing Science from the University of Kansas. Douglas W. King, Ph.D., was a professor within the basic medical program at Washington State University until his death in 2001. He was greatly loved by his students and fellow faculty, and had set up a scholarship program in anatomy for students with diabetes.
